

2020
Certifications

ETL listed

The entire booth is ETL listed and conforms to UL STD 1286. ETL is the official approval mark of Intertek, which is part of a group called Nationally Recognized Testing Laboratory (NRTL) that tests to the UL standards.

**Conforms to
UL STD 1286**

UL 1286 is the standard for office furnishings. It's often used for cubicles and panel systems, as well as certain table and storage products with electrical components. UL 1286 is most representative of ROOM's phone booth because the booth has an internal wiring and wall structure that most closely resemble a cubicle or panel system in an office space.

**CSA STD
22.2 #203
certified**

Canadian Standards Association (CSA) is a group that sets safety standards in Canada. ROOM's ETL listing is certified to CSA 22.2 #203, the category for modular electrical systems for office furniture.

**BIFMA
Certified**

Business and Institutional Furniture Manufacturer's Association (BIFMA) is the leader in developing furniture safety, durability, and sustainability standards. UL standards for furniture dictate that products adhere to certain BIFMA guidelines. ROOM's phone booth meets the BIFMA x5.6 -2016 Panel System requirements.

**ASTM E84
tested**

ASTM E84 is the standard testing method for Surface Burning Characteristics of Building Materials. It's the fire test dictated by UL 1286. Test results for ROOM meet the requirements set by UL STD 1286. ROOM's ETL listing indicates that the booth meets UL 1286 standards for flammability.

**TSCA VI
compliant**

TSCA VI is the formaldehyde emissions standards for composite wood products. EPA TSCA VI is the federally adopted standard based on CARB, which was developed in the State of California. All of ROOM's MDF is compliant to TSCA VI because it's CARB compliant.

CONFORMS TO UL STD 1286.
CERTIFIED TO CSA STD C22.2 NO. 203.
MEETS OR EXCEEDS ALL APPLICABLE BIFMA STANDARDS.
