
LAVIGO

THE PRINCIPLE OF SIMPLICITY

The simple designs are the ones that outlive the trends and maintain their style for the future. LAVIGO was designed by the architects at STRUCTURELAB in Düsseldorf with this in mind. Combining classic design and minimalistic form with innovative technology, LAVIGO was developed as a flexible lighting solution for modern private and open office concepts.

Thanks to powerful LED modules, LAVIGO has a higher share of indirect light than comparable luminaires. This reduces the amount of direct light needed, creating more uniform illumination that is much more pleasing to the eye. The direct light component uses light-amplifying micro prism optics for optimal glare protection. Featuring independent indirect/direct dimming capabilities, the right light level is easily achieved with LAVIGO.

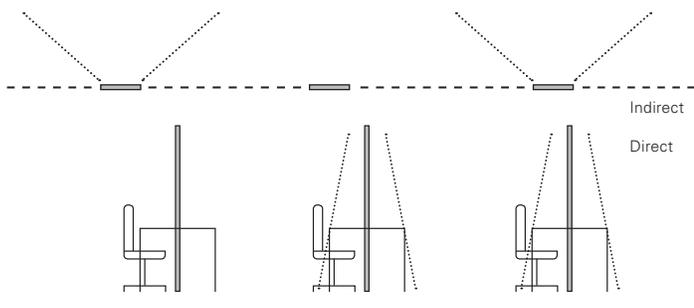

LAVIGO TECHNICAL DATA

The operating elements do not detract from LAVIGO's simple, minimalistic appearance. Flush-mounted into the pole section, the control panel is positioned at an ideal height for either sitting or standing. LAVIGO boasts intuitive operation. Direct and indirect lighting can be regulated independently of one another, providing user comfort and promoting efficiency in the workplace. LAVIGO's subtly rounded edges are easy on the eye and add to the grace and sophistication of the design.

Lamp Type: 176 x LED
Luminous Flux: Approx. 10,000 lumens
Color Temperature: 4000K
Power Consumption: 81W

Available with **LUM CONNECT** intelligent light controls for integrating custom dimming, presence sensing, and biodynamic lighting. Consult Factory for more details.

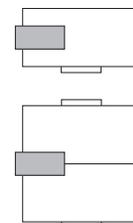

Direct and indirect light can be switched and dimmed separately

LAVIGO with one luminaire head*

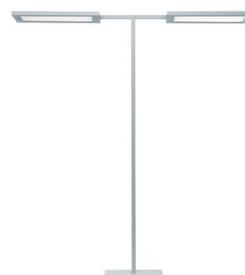

*Also available in table-top mount

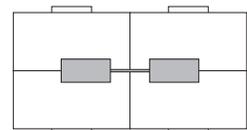

Suitable for one or two work stations when positioned laterally depending on the light consumption.

LAVIGO TWIN-T with two luminaire heads

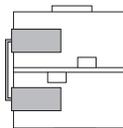

Suitable for up to four work stations when positioned centrally.

LAVIGO TWIN-U with two luminaire heads

Suitable for two work stations with dividing wall when positioned laterally.
