

Introducing Flo X Single and Multi Mount Arm

Flo X is the latest evolution of high load monitor support.

Flo X is capable of holding heavy screens up to 18kg. Its dynamic functionality and considered ergonomics mean you can quickly and easily establish the optimal working position, enhancing productivity and wellbeing. Finished in range of colour options, Flo X is sure to fit right into your workspace.

EFFORTLESSLY ERGONOMIC

Flo X's dynamic adjustment allows you to move even the largest and heaviest of screen to the optimal position with absolute ease. And that's not just convenient, it ensures your head is in a neutral, balanced position, reducing musculoskeletal stress and decreasing the likelihood of injury. Correct posture also improves breathing and oxygen intake, reducing fatigue and boosting concentration levels.

NEXT GENERATION TILT

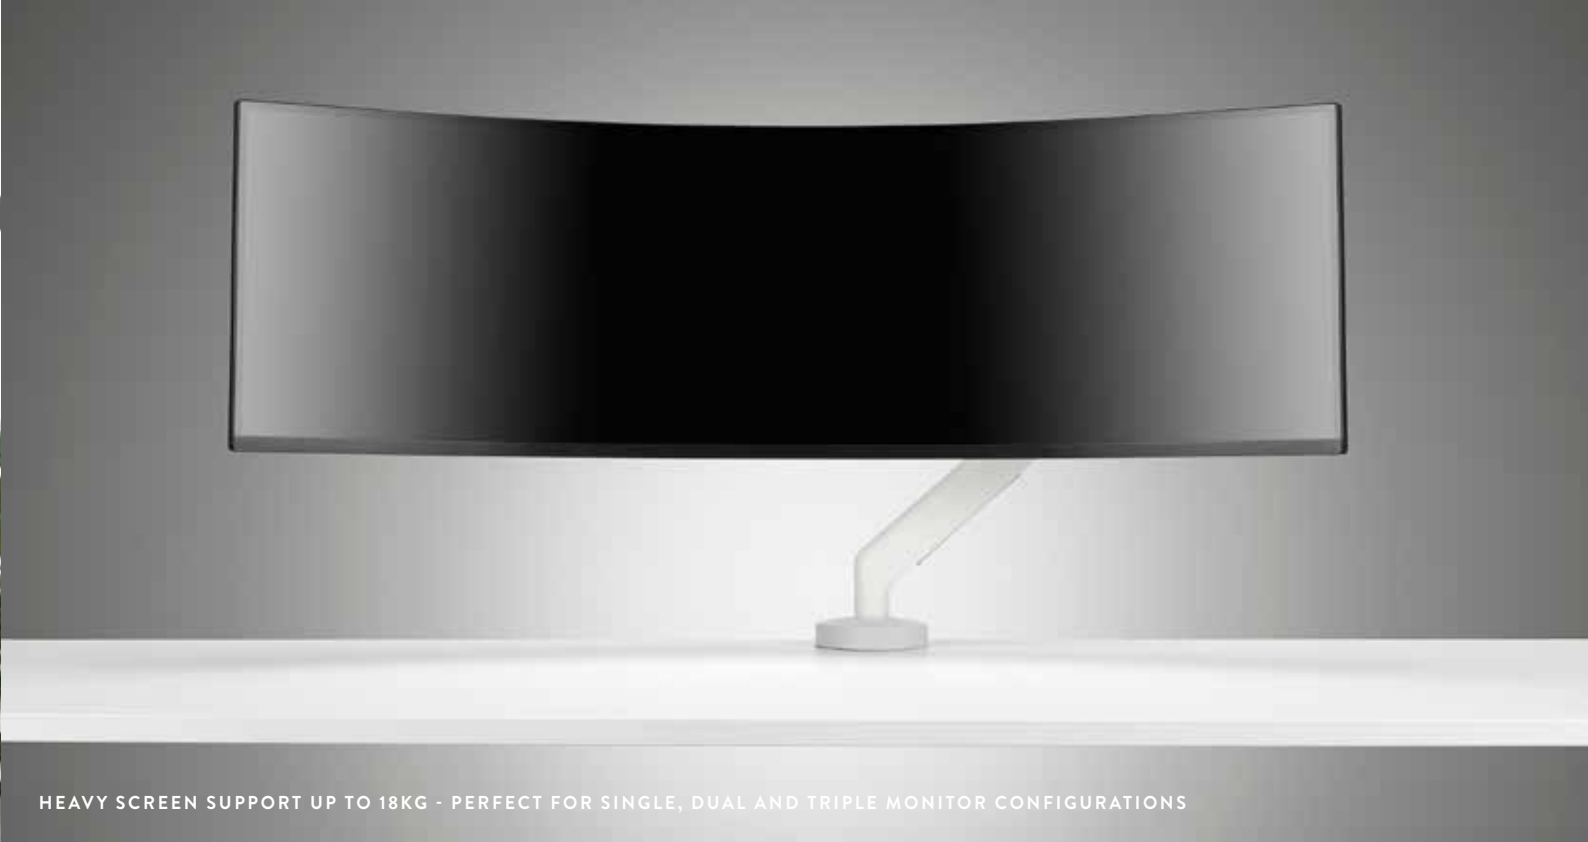

Using the next generation of our D-ring tilt mechanism, you get all the existing benefits of fingertip adjustability and easy-to-balance tilt, but now able to accommodate even bigger screens and curved formats. Tilting your screen allows you to eliminate glare and reflections to minimise visual fatigue and digital eye strain.

DUAL SPRING TECHNOLOGY

Our unique dual spring technology has the power to accommodate a range of large screen sizes and weights up to 18kg. But with future-proof flexibility built in, Flo X can also be configured to support lighter screens (down to 3kg), catering to the current trend of large monitor screens becoming lighter. Hence giving you the flexibility to choose the best screen to suit your workspace and your needs.

FIND THE PERFECT ERGONOMIC POSITION IN SECONDS

No matter the size of your screen, Flo X's dynamic, fingertip adjustment means you can perfectly position, tilt and also flip your screen from landscape to portrait and back effortlessly. That's not just convenient, it helps you avoid the stresses and strains of awkward postures caused by poor positioning and repetitive scrolling.

HEAVY SCREEN SUPPORT UP TO 18KG - PERFECT FOR SINGLE, DUAL AND TRIPLE MONITOR CONFIGURATIONS

FINE HEIGHT ADJUSTMENT
ACROSS MULTIPLE MONITORS

EFFORTLESS ADJUSTMENT
WITH HANDLE

ONE SINGLE POINT FOR COMPLETE
MULTI-SCREEN ADJUSTABILITY

EFFORTLESSLY ERGONOMIC

Taking large format and multi-screen support to new ergonomic heights.

ONE SINGLE POINT FOR COMPLETE MULTI-SCREEN ADJUSTABILITY

Flo X Multi Mount Arm has been specifically designed to be as easy to adjust with two or three screens as it is with a single screen. One single tilt mechanism allows you to adjust all screens at once, so fine tuning the perfect position for all of your screens couldn't be simpler.

FLAT, COCKPIT OR CONTINUOUS CURVE

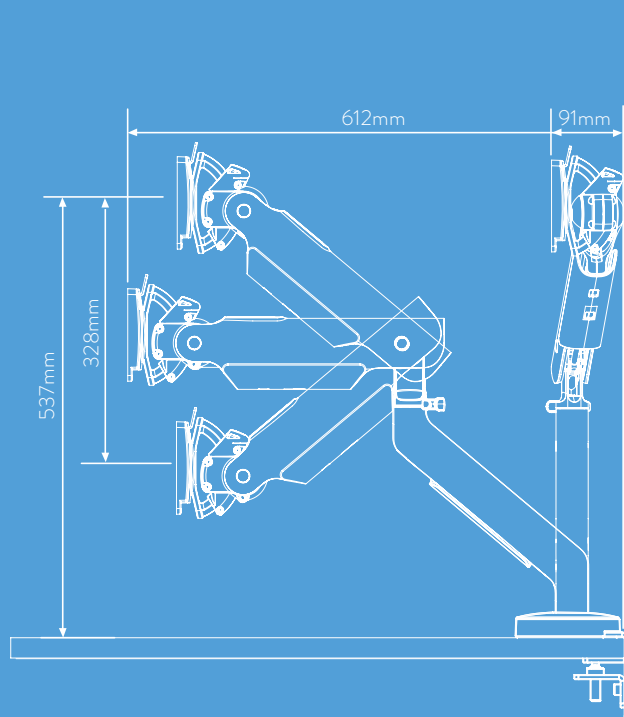

Easy side-to-side rotation also means you can effortlessly arrange your screens in a flat, cockpit or in a continuous arc of curved screens, creating a seamless single screen experience.

HIGH-CAPACITY CABLE MANAGEMENT FOR A TIDY WORKSPACE

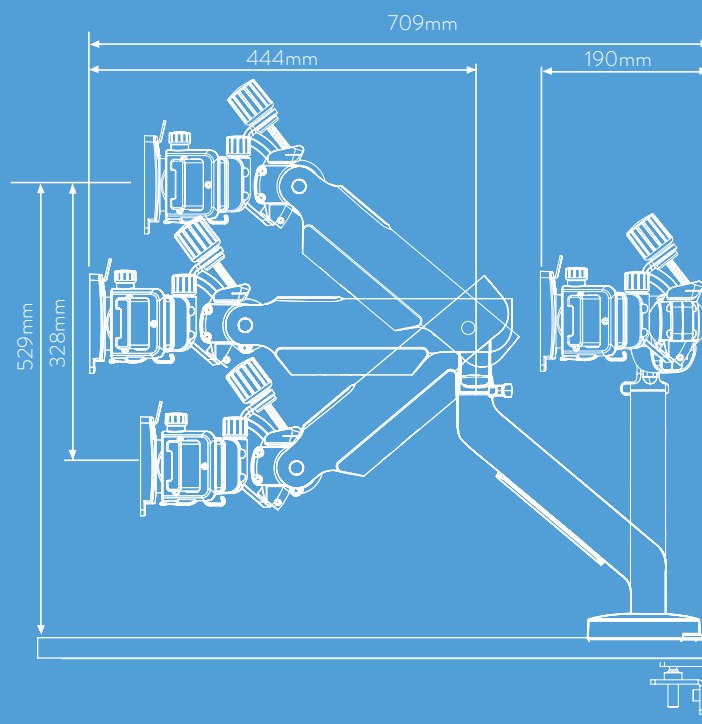

Having multiple monitors needn't mean a tangle of cables as Flo X has the capacity to keep them all neat, tidy and under control. That means no more wayward cables to snag and catch while adjusting screens and no more awkward body positions to rethread, re-plug and untangle them.

FLO X

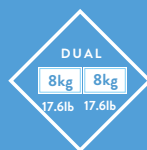

FLO X MULTI MOUNT ARM

OVERVIEW

- Available in single, dual and triple screen configurations
- Effortless ergonomic adjustment
- Supports up to 18 kg
- Dual spring technology
- Next generation D-Ring tilt
