

HermanMiller

T2™

T2. The next-generation smartdesk, changing how and where you work.

The Importance of Empowerment

What makes tech giants like Google, Facebook and startups like Uber so successful? Part of what keeps them ahead of the game is their approach to workspace strategy; they're stepping outside the norm to create unique spaces that inspire employees and build a sense of belonging.

At Herman Miller, design has always been human-centric. We recognise the value in empowering people to work the way they want to. We believe workspace should be designed to suit an organisation's vision and mission. While each organisation has its own unique purpose, there's one factor that's common to each of their environments: freedom. Individuals can choose where and how they want to work, depending on their needs at that particular moment – the power is in their hands.

Similarly, these companies are decentralising the decision-making process, empowering staff to be self-sufficient. Decisions are made quickly, processes move faster, and employees feel motivated and significant. They're engaged and thrive in a supportive environment that fosters interaction, camaraderie and inspiration.

The end result? Ideas that can change the world.

“Workers’ comfort directly affects important predictors of operational efficiency ... the majority of respondents believed that the office environment had a direct influence on their well-being and self assessed productivity.”

- Derek Clements-Croome and Li Baizhan “Productivity and the Indoor Environment”

Get Comfortable.

A Herman Miller survey found similar results: 500 respondents stated that having an office that was comfortable to work in was the most important workstation attribute – and this rang true across all worker types.

Defining “comfort” is very personal, and subjective. How do we quantify it? Dr. Jacqueline Vischer, professor in the Department of Environmental Design, University of Montreal, broke it down to physical, functional and psychological factors. According to Vischer, physical comfort comes first: “If you don’t have this, there’s no point in talking about functional or psychological comfort.”

Contributing to our physical comfort in the workspace is the feeling that we have a sense of control over it. These were the findings of Herman Miller research summary “It’s All About Me: The Benefits of Personal Control at Work”. With a sense of control in place, we are better able to get work done and our stress levels drop. In turn, this leads to greater productivity and our health even improves. It’s a virtuous circle.

The Future of Working is Here.

T2 is a mobile, height adjustable table with an adventurous personality and a highly intelligent core engine that responds to your needs. T2 takes height adjustability to another level with the addition of user centered features and app control capabilities. T2 moves and moves, supporting your postural changes throughout the day – from sit to stand, enhancing your sense of wellbeing. T2 is highly agile and can be moved easily to new environments you wish to create.

Sit-to-stand desks will never be the same.

A Real Performer.

We have designed T2's core engine so it's tucked neatly out of sight, and we have made sure every movement is speedy yet discreet. We have seamlessly integrated the high-performance actuator and structural beams into in the custom-tooled chassis. This way, the undercarriage stays clutter-free.

Carefully designed cable reticulation conceals all cords running from the floor to the desk. The only visible cable, which connects the desk to a power point, retracts easily when you step on the auto-rewinder.

Silent and Fast.

We have engineered the actuator to run as silently and smoothly as possible: the desk surface rises 28mm (with loading) or 58mm (without loading) every second you're in press mode. With the digital version, the adjustment ranges from 650 to 1250mm. We have considered every detail, taking extra care to ensure load distributes equally across the work surface.

Devices in Order.

T2 brings the power to you. The power console is designed with a dynamic slant so you can easily access your devices as they charge. It serves another purpose – to keep your workspace clutter-free. Hidden under the console is a compartment that's spacious enough for users to keep devices out of sight and it's also where all your power sockets are located.

T2 has so many applications: use it on its own in a standard office environment, or in a Haven setting, or alongside Herman Miller Arras Spine solution or Metaform system designed for a Hive, Jumpspace or Clubhouse.

Try Every Position

Used in combination with a Herman Miller chair, T2 supports lounge, seated and standing postures. Even when you sit down, T2 anticipates your ergonomic needs with a built-in footrest, encouraging you to lift and rest your feet on a soft incline.

Effortless Adjustments.

With T2, we put the emphasis on choice and individuality. You can control your desk via the touch screen control panel, which fits flush with the desk's surface. The membrane controls are integrated into the surface of the desk, with an LED-lit indication providing real-time information on your height adjustments. The intuitive panel regularly invites you to interact with it by changing postures throughout the day.

Built for Agility.

T2 is a mobile work point; it's designed to adapt to all kinds of work environments and needs – whether you're working with the art team or with accounting, having a meeting or looking for a quiet corner in which to concentrate. To get you where you need to go, the table is set on high-performance, concealed castors guaranteeing you a smooth ride as you glide across the workspace.

The Specifics.

- 17-inch, lined compartment with built-in sockets
- LED-lit display
- Designed to integrate with CBS monitor arms
- One-touch adjustment with real-time height details
- Collision sensors to prevent the desk from colliding with obstacles
- Concealed castors for workspace cruising

A Desk for Everyone.

At Herman Miller, we recognise that everyone has different needs in the workspace. We have a broad range of ergonomic workstation solutions in our portfolio, including Locale and Augment. With T2, we're building on our technical expertise and design know-how and adding to our extensive selection in order to meet the needs of every one of our customers.

T2 has so many applications. Use it on its own in an enclosed office as an executive desk or create a clubhouse with T2 alongside Herman Miller Arras Spine solution or Metaform.

A World of Colour.

T2's unique use of colour is another way in which it stands out from the crowd and it lets you create your own, personal experience of T2. The desk itself comes in thirty-six different colours combination, and there are nine options for the edge band – an idea inspired by bold geometric fashion prints, contrasting hems and collars.

Specification.

Stand By Me.

Herman Miller is a leader in workspace design and our products have a limited, 12-year warranty*. T2 is fully assembled in Ningbo, China, and can be shipped anywhere in Asia-Pacific. From start to completion, each T2 desk is assembled in a tightly controlled environment.

*Warranty limitations are as follows: 5 years on all electrical and mechanical parts, 1 year on the foot mat.

Eco-minded.

Herman Miller is committed to making the world around us better. Our new, 10-year sustainability strategy begins with positive transparency, products as living things, and becoming greener together. We have sharpened our goals around the smart use of resources, eco-inspired design, and becoming community-driven.

Our commitment to designing for the environment extends beyond a single token product to incorporate a comprehensive, holistic approach. T2 will be evaluated within the rigours of our DfE Protocol. With every Herman Miller product, the new product design process involves the DfE team meeting with the designers and engineers to review material chemistry, disassembly and recyclability, as well as incoming packaging, and potential waste generation. T2 is produced in a Herman Miller facility with ISO 14001.

T2 can be taken apart and recycled.

Distribution Rights.

Law protects all the designs shown here. Herman Miller, Inc. has obtained all the rights to make and distribute designs from the owners in question. In addition, Herman Miller, Inc. holds exclusive worldwide manufacturing and distribution rights for these products, with the following exceptions.

All dimensions stated within this document are nominal and/or approximate only and subject to variation.

Printed in China. Please recycle this catalogue.
